Determine the cause and effect relationship in the following: 'The roads were slippery because it was raining.'

cause - Rainfall , effect - slippery road

Write a JavaScript function that prompts the user to input a number, and then gives them 5 chances to guess the square of the number.

```
function guessSquare() {  
  
    let originalNumber = parseInt(prompt("Please enter a number:"));  
  
    let square = originalNumber * originalNumber;  
  
    for (let i = 0; i < 5; i++) {  
  
        let guess = parseInt(prompt("Guess the square of the number:"));  
  
        if (guess === square) {  
            alert("Congratulations! Your guess is correct.");  
            return; // Exit the function  
        } else {  
            chances  
            let remainingChances = 4 - i;  
            alert("Incorrect guess. You have " + remainingChances + " chance(s) left.");  
        }  
    }  
  
    alert("Sorry, you've run out of chances. The correct square is " + square + ".");  
}  
  
guessSquare();
```

What is JSX? write syntax
